The Philippine Institute of Industrial Engineers (PIIE) is a professional society devoted to serving the needs of industrial and systems engineering professionals and institutions who value the industrial engineering practice. It was created to provide a venue where members will have the opportunity to enhance and strengthen their industrial engineering capabilities and expertise.

IE Certification is a voluntary process, which validates an individual's qualifications in the field of Industrial Engineering (IE) professional practice. It demonstrates to employers, clients, and peers the individual's knowledge and experience and signifies his or her commitment to continued excellence in IE professional practice. In addition, it increases visibility, builds credibility, and validates expertise with those outside the profession.
